SENIOR CREATIVE BRAND & DIGITAL DESIGNER

Hi,

I am a Senior Brand & Digital Designer with over 10 years' experience delivering brand-led, digital-first design across agency and commercial environments. My work spans branding, campaign design, digital and social content, motion graphics, editorial, illustration, print and internal communications, with a strong focus on consistency, clarity and craft.

I have extensive experience owning and rolling out visual identities across multiple channels, working closely with marketing teams, stakeholders and senior leadership to translate strategy into clear, accessible and engaging visual communication. I'm particularly comfortable acting as a central design authority — developing guidelines, templates and assets that ensure cohesion across digital, print and motion outputs.

Alongside my design background, I bring strong conceptual thinking, creative direction and mentoring experience, supporting junior designers and contributing to the wider creative direction of campaigns and brands. My approach is considered and detail-driven, with an emphasis on usability, accessibility and audience understanding.

I have worked across B2B, B2C and Not for Profit sectors, including retail, events, charity & education, industrial, publishing, entertainment and healthcare-adjacent projects, and I'm confident delivering work that balances creativity with commercial and operational realities. I'm now seeking an in-house or consultancy-style role where I can contribute at a senior level, take ownership of brand and digital output, and do meaningful, sustainable work.

- Senior hands-on creative
- Concept-led brand thinker
- Trusted creative lead
- Purpose-driven designer
- Multi-channel design specialist
